

Mihai Damaschin

Web developer

✉ herewaiforever@gmail.com 📞 +373 62071372 📍 str. Alba Iulia 3, MD-2008 Chisinau

Profile

I'm a web developer with an approximative experience of 5 years and I have a rich background in handling high-scale and complex projects across diverse industries, including education, streaming, cloud interfaces, payment processors, complex dashboards, Shopify, CRM, mail system, and more. I thrive on turning ideas into fiable, user-friendly solutions that make a real impact.

There are some links bellow to my github accounts, there is nothing interesting to present at the moment on this accounts, just some project needed for some grades or started and unfinished projects till college or university times. Anyway you may find something interesting.

Education

Bachelor of Science in Information 09/2015 - 06/2019
Center of Excellence in Informatics and Informational Technologies, Chisinau

Bachelor of Science in Information 09/2019 - 06/2022
Universitatea de Stat din Tiraspol, Chisinau

Master of Information Technology (MIT) 09/2022 - Present
Universitatea Pedagogica de Stat Ion Creanga, Chisinau

Employment

Fullstack developer 07/2019 - 11/2019
EBS Integrator, Chisinau

As a Fullstack Developer, I dedicated a year to mastering the intricacies of PHP and jQuery. I collaborated on diverse projects, contributing my skills to both the server-side (PHP) and client-side (jQuery) development. My responsibilities ranged from designing and implementing robust back-end functionalities to creating dynamic and interactive user interfaces.

DonateSmarter

At this project I:

- implemented some new modules and made some bugfing

I consent to the processing of my personal data for the purpose of recruitment for the position to which I am applying.

Personal details

Date of birth
November 29, 1999

Skills

React.js

Typescript

Next.js

Redux

React query

Jest

Capacitor

Ionic

Electron

Firebase

Antd

Stripe API

Paypal

ChargeBee

Service Workers

Google Tag manager

SEO optimizations

Storybook

Streaming

Styled Components

Tailwindcss

- integrated a new google map with custom pines logic
- integrated stripe

Frontend developer

12/2019 - 11/2023

EBS Integrator, Chisinau

With a primary focus on Front End development, I've spent the past four years honing my expertise in cutting-edge technologies. React and TypeScript became my forte, allowing me to craft seamless and responsive user interfaces. I successfully delivered projects by combining the power of React's component-based architecture with the type safety of TypeScript. Anyway, because there was some gaps of work on react, I worked for some periods on python.

Unfortunately I can not provide here information about all the projects I worked on, but I'll write here about some public projects:

Global database public pages

At this project I:

- implemented figma design using React and Typescript, Redux, Next.js and more other packages
- did the responsive side
- designed the work flow between their CRM system and the future website and implemented all need changes to the CRM side
- connected project to CRM API and made all the content dynamic
- optimized the site for the search engines
- implemented storybook
- wrote unit tests

Here is the link: <https://www.globaldatabase.com/>

Parents Checkout pages

At this project I:

- Implemented requested logic flow
- Implemented all the components and pages according to figma design
- integrated traking services
- integrated all the requestet payment processors
- developed this flow to run on all requestet devices or cases

Here is an example link to on of those pages: https://checkout.parentsapp.co/checkout/pay-offer/651?utm_medium=online&utm_source=HomepageAAP

Energbank

At this project I:

- implemented the requested components according to design
- adjusted their responsive side
- implemented storybook

The main difficult thing here was that the project has a dynamic site builder behind, any component may be placed anywhere. So new components implementation are not the easiest task.

Here is the public url: <https://www.energbank.com>

I consent to the processing of my personal data for the purpose of recruitment for the position to which I am applying.

SASS

Recharts

Jira

Jquery

Python

Django

Wordpress

PHP

REST API

MySQL

PostgreSQL

Languages

Romanian

Russian

English

Unfortunately this are all the public sites I can post in this CV. In the remaining space i will describe few of project I worked on but what are not for public use.

Parents Dashboard

At this project I:

- proposed solutions regarding how it would be better to solve the future implementations and the current problems of the project
- implemented all the logic and visual components(modules as users, subscriptions, offers, posts, comments, mobile app settings, statistics, products, payment providers settings, orders and more other)
- integrated graphics for data statistic visualization

Parents Web

At this project I:

- proposed solutions regarding how it would be better to solve the future implementations and the current problems of the project
- implemented all the requested logic
- implemented custom video player with streaming options
- implemented notifications throw service worker

Mail service

At this project I:

- implemented all the base functionality of a usual applications with are working with emails(send, forward, reply, emails listing, settings and more other), according to the figma design

Smart portal

At this project i:

- Implemented all functionality according to figma design
- worked with google signed urls
- implemented storybook
- added possibility to view documents content and write comments for each

EBS planning(python experience)

At this project I:

- managed all the estimations and tasks what must to be done, for front and back side
- monetized frontend devs
- implemented all the backend side
- implemented sync tasks with our teamwork app api
- made the main report

If you still have any questions regarding my previous projects, don't hesitate to answer me.
